## **AOMEI Backupper**

*Say "NO" to Data Loss*

## AOMEI Backupper Introduction

AOMEI Backupper is designed for PC and Server to back up, restore and clone for system and data. You can easily use it to backup files/folders, partition, disk and system. Once your data is lost or system crashes, you can use AOMEI Backupper to restore system image or other data, and it can also restore system image between dissimilar hardware. For some important files frequently, it also can sync them to another location to save, and you can read files directly without decompressing or exploring image. In addition, system/disk/partition clone features can help you upgrade disk from HDD to SSD, small disk to a big one, and etc.

### Main Functions:

Backup Options: file backup, system backup, disk/partition backup, etc.

Clone Options: disk clone, partition clone, system clone.

Support schedule backup, incremental backup and differential backup.

Support dissimilar hardware restore.

Utilities: PXE boot tool, Image deploy, explore images, create a bootable disc, check image.
