Choose a way to perform the scheduled backup: ?

☐ Full Backup

☐ Incremental Backup (Default)

☒ Differential Backup

If the task is enabled with event triggers, it is unable to manually specify neither Windows Task Scheduler nor AOMEI Service Program to perform this task.

Backup Scheme

Enable Backup Scheme

Differential Backup Scheme

Retain the number of backups: 3

When the number of backups exceeds the specified value, the oldest backup will be deleted automatically. The program will delete differential backup first and then delete full backup.

☒ Create a full backup and always retain it before performing the scheme.
