AOMEI TECHNOLOGY

cBackupper

Say "NO" to Data Loss

cBackupper Introduction

cBackupper is an application that supports both cloud-to-cloud backup and PC-to-cloud backup. It is designed for protecting the data of your cloud services as well as your local computer. By using cloud-to-cloud backup, cBackupper provides you with a web-based service, it has user-friendly interfaces and it is very easy to use. By using PC-to-cloud backup, there is a desktop application for you. With cBackupper, you can back up your data to cloud services with ease and avoid the risk of data loss. Also, it allows you to combine your cloud services into unlimited backup space, in that case, your cloud storage space can be fully used and your data will be well-protected.

Main Functions:

Cloud-to-cloud backup: Backup your data from one cloud service to other cloud services without downloading and re-uploading.

PC-to-cloud backup: Backup your data from local computers to cloud services safely.

Schedule backup: To back up your data on a specific time.

Support email notification and history versions.

Support file restore, backup scheme, file filter.

Supported Cloud Services:

Dropbox, Google Drive, OneDrive, FTP/SFTP.

cBackupper Edition

cBackupper currently has only one edition: Free edition.

cBackupper Free Edition

In the free edition of cBackupper, you can back up your data from any location and store it in cloud services. It will help you reduce the risk of computer data loss, access files across multiple devices, make recovery easy and instant, and so on. Besides, you can also combine unused space of all of your connected cloud services into one, so that you can fully use them.
